Dear reader,

Welcome to this new journal, intended to be an international forum devoted to reviews on immune-mediated inflammatory diseases (IMiDs) with a multidisciplinary approach. This is a rapidly evolving field, where translational research becomes quickly relevant from a clinical perspective, and there is no doubt that this represents a big challenge for everyone working in our specialties. To address the need for a comprehensive and up-to-date knowledge in IMiDs, the journal will include reviews made by well-recognized experts.

J IMiDs will be published quarterly and will cover important topics on the different aspects of IMiDs, from basic to clinical. We hope that the balance in different topics and specialties covered in each issue will satisfy the interest of a diverse readership.

A well-recognized group of scientists has been invited to join the Editorial Board of *J IMiDs*. We are grateful to all of them for agreeing to collaborate in this exciting endeavor.

We hope you will enjoy reading the high-quality contributions appearing in *J IMiDs*, and we encourage you to forward any suggestions you may have for improving this journal.

Sincerely, the Editors.
